### Note:

- 1 All plans are prepaid monthly in advance by automated Credit Card only.
- 2 Early termination of the agreement incurs a cancellation fee. Change of phone line or relocation to another address is equivalent to termination and a new service. The cancellation fee (if appl) may be credited if immediate relocation occurs.
- 3 ADSL may not be available due to a variety of technical reasons.
- 4 Total data downloads in excess of either the peak or off-peak quantities, counting from your last billing anniversary date, will result in the slowing of the service to a speed of 128Kbps during that period until the next billing anniversary date.
- 5 With the higher speeds, the actual speed depends on the customer line quality and distance, internal building wiring, as well as the CPE used. The speed can therefore only be accurately determined once the service has been installed and tested. Newer ADSL2+ capable CPE are recommended to obtain speeds greater than 6Mbps. It is estimated that approximately 2/3 of customer locations should experience between 6 and 14 Mbps. OntheNet does not guarantee that higher speeds will be attainable in all cases.
- 6 Each phone device sharing the service phone line needs a line filter.
- 7 All OntheNet supplied DSL Modems include one DSL splitter/filter, delivery and manufacturer's warranty.
- 8 Maximum total package cost over 12 months with 4 port router, \$29/month plan and \$99 establishment fee is \$546. Maximum total package cost over 12 months with wireless 4 port router, \$99/month plan and \$99 establishment fee is \$1,466.
